BioSamples with an antibiogram, in-scope organisms (NCBI BioSample, worldwide): n = 26,886
No Pathogen Detection result: 777
With an AMRFinderPlus result in Pathogen Detection (one genome per BioSample): n = 26,109
Outside the United States: 6,522
Collected in the United States: n = 19,587
Food, animal, environmental or non-clinical: 14,054
Laboratory reference strains (JE2, LAC): 2
U.S. human clinical isolates, reference strains removed: n = 5,531
No interpretable panel-paired drug result: 363
Benchmark: at least one interpretable result for a panel-paired drug n = 5,168
